connecting your System i to the world

Parse, compose, and transmit XML.

Offer a web service on your System i.

Call a web service on another machine.

Leverage your existing System i RPG investment.

No Java. No Websphere.

Web services in native RPG.

Run through your own
field of joy.

www.rpg-xml.com

FEATURES & BENEFITS

- Parse, compose, and transmit XML
- Offer a web service on your System i
- Call a web service on another machine
- Fully supports HTTPS/SSL
- Compatible with SOAP-based web services

"With the help of RPG-XML Suite I was able to cut my personal project time in half. RPG-XML Suite is a proven toolset that allows for the easy creation of XML web services from RPG. I'd recommend it to anyone."

- Bruce 'Hoss' Collins,
AAA Cooper Transportation

•Code generators build programs fast – Lessening the typical learning curve and time required to build programs from scratch.

•100% System i native toolset!

•No Java. No Websphere. 100% RPG. There are no additional technologies, hardware, or software required to effectively implement RPG-XML Suite.

•75% of all previous customer web services were created and implemented in 1 business day using RPG-XML Suite!

AVAILABLE RESOURCES

Various resources are available at www.rpg-xml.com to assist you with your web service requirements.

INDUSTRY-SPECIFIC USES

RPG-XML Suite is widely used across industries. Here are a few common ways RPG-XML Suite is used by customers today.

Insurance: process claims, transfer data to credit agencies, verify status of applicant info.

Credit/Finance: provide real-time credit scores from multiple credit agencies based on applicant data passed.

Transportation: Send/receive real-time shipment data to customers or supply chain. Directly interface with major shipping carriers (UPS, FedEx, etc).

Manufacturing: Distributor requests additional inventory, manufacturer responds with product supply and delivery date.

Retail: .Net developer creates, displays, and updates product info on a retail website - calling RPG web services to gain access to DB2 data

"I followed some example code on your website and have a sample app up and running very similar to what my client needs. I just need to adapt it to their JD Edwards World database. Your software is making me look like a hero!"

-Carl Galgano,
EDI Consulting

EXPERTISE

RPG-XML Suite was primarily developed by Kregeltech Senior Developer Aaron Bartell. Aaron is a regular speaker and contributing author to a variety of respected trade sources including SystemiNetwork.com, IBM Systems Magazine, and MC Press Online. Visit www.rpg-xml.com to read and view past articles and presentations on topics surrounding SOA and web services on the System i.
